Lockout/Tagout

Lockout/Tagout: Training for Employees 310.03.1

(American Training Resources)
(16 minutes) (DVD) (English)

Energy—it's a part of our lives every day. Being around energy is an every day part of our lives, and an important part of our workplace operations. High pressure steam, electricity, hydraulic and pneumatic systems, even the force of gravity are common forms of energy used to power our machines and processes. While energy is obviously useful, it can also be dangerous. Understanding how to properly control hazardous energy is one of the keys to workplace safety. This program reviews the procedures used to control this energy, commonly known as lockout/tagout. Topics include types of energy sources, the energy control plan, situations requiring lockout/tagout, lockout/tagout devices, energy control procedures and special lockout situations.

Water

Reliable Coliform Sampling for Water Utilities 520.36.1

(AWWA) (16 minutes)
(DVD) (English)

Improper sampling is one of the most common errors in water quality analysis. This video gives operators approved, step-by-step procedures for taking water samples for coliform testing.

Particular attention is paid to the all-important step of selecting sampling sites. The procedures shown comply with the Total Coliform Rule and the Safe Drinking Water Act. This video will help your utility avoid false test results and violations, while it helps you maintain public confidence in the quality of the water supply.

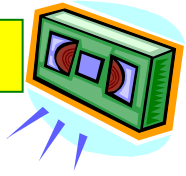

Confined Spaces

Confined Space Entry: Keeping Public Employees Safe 100.24.1

(Coastal) (15 minutes)
(DVD) (English, Spanish, Portuguese)

There is no shortage of potential hazards when working in a confined space. Use this program to train your public employees to work safely in these dangerous spaces and keep your organization OSHA compliant.

Here's what members are saying about videos!

👍👍👍=Very Good 👍👍=Good 👍=Fair
