# Maintenance Management System Technician's Field Computer (GIS Based) Assigned Preventive Maintenance Work Orders (Scheduled and Completed)

The screenshot displays the 'infraMAP 6.1.24' software interface. On the left, a 'Work and Tasks' panel lists various maintenance tasks, including '3 YEAR FIRE HYDRANT INSPECTION QS...' and '5 YR AIR VALVE INSPECTION QS-109'. Below this list are buttons for 'View' and 'Add to', and a summary for 'My Work Orders (681)' with a 'Create Work Orders' button. The main area shows a GIS map with a grid overlay, where green circles and yellow triangles represent assigned work orders. The map includes a toolbar with navigation and editing tools, and a 'System Valve' tool. The Windows taskbar at the bottom shows the 'start' button, taskbar icons, and system tray information including the time '7:05 AM' and user 'ADMIN'.
