Attn: H.R. Labounty Safety Award Program

Reason for nomination: Conducting Chemical Spill Emergency Response Drill

An important part of a Carmichael Water District (CWD) plant operator's job responsibility is to accept bulk deliveries of water treatment chemicals. These chemicals are hazardous in nature and have to be off-loaded adhering to strict procedures. If during the course of accepting the chemical delivery there is an emergency, trained employees need to know how to respond. Since all of CWD plant operators are HAZWOPER trained, George Richmond thought an emergency response drill that focused on spill response would be an effective activity. The drill was conducted by George Richmond and evaluated by the Plant Superintendent. The evaluation focused on proper use of PPE and the basic elements of spill response. Attached are pictures of the drill.

This effective drill made it possible to correct deficiencies in our spill response program and will assist in educating employees on the elements of spill response. For his actions; I would like to recommend George Richmond for a safety award.

Sincerely,

Mark McClintock, Production Superintendent  
Carmichael Water District
