

H. R. LABOUNTY SAFETY AWARD PROGRAM NOMINATION FORM

Agency: Madera Irrigation District

Employee Nominated:

Name: Alva "Smokey" Carter

Job Classification: Engineering Tech 1 - Meter Tech

Reason for Nomination: Alva has been an employee of Madera Irrigation District for 40 years. He has become a subject matter expert in his field. I am nominating him because he has recently taken measures to retrofit the District vehicle that he is assigned by:

- Cutting out two foot holes on the rear of vehicle to allow for ease of climb,
- Securring a bar to grab, adding extra support while climbing onto the back of truck.
- Affixing a rod onto the rear of truck to hold the safety cones so they are easily accessible.

All these safety initiatives not only make doing his job more safe, but are a preventative measure for worker's compensation claims. We appreciate his work, and even though he is hoping to retire in coming years, he said that these items will serve the next employee in this position very well. Please consider this nomination

Nominated by: Tanesha Welch
