Good Morning,

Here is Mark Avila's answer to Lee's question:

"Each meter box is different and has minimal visibility. Operators need to have a visual for alignment in setting meters."

Is answering this question through email sufficient or does he need to resubmit with this comment as well?

Thank you,

Nadia Reesman, COSS

Can you review and respond to Lee's questions /comments? Sometimes a little more explanation helps us understand what is going on. Resubmit no later than 10/1 for review.

Thanks

 P.O. Box 619082
 Roseville, CA 95661-9082
 FAX: (916) 774-7040

#19

**NOMINATION FORM – Page 2
FOR H.R. LABOUNTY SAFETY AWARD PROGRAM**

Nominee:

Describe the overall purpose of your idea and how it works.

Fabricating tools to make installing Angle meter shut-off easier and safer. Using pipe wrenches is too difficult and causes injuries due to limited working space inside the meter box.

What is the major impact it has on savings and/or efficiency?

Much easier to install AMS. Eliminates hand injuries.

Please attach any photos or documents that support your idea.
