Good Morning,

Here is Matt Wagner's answer to Lee's question:

"The tool is used in meter boxes for side mount ratcheting. Adding a height extension would limit the mobility in operating the tool. Adding more metal for height would also increase weight and overall effectiveness."

Is answering this question through email sufficient or does he need to resubmit with this comment as well?

Thank you,

*Nadia Reesman, COSS*

Can you review and respond to Lee's questions /comments? Sometimes a little more explanation helps us understand what is going on. Resubmit no later than 10/1 for review.

Thanks

Please attach supporting documents and forward to:

ACWA JPIA  
 P.O. Box 619082  
 Roseville, CA 95661-9082  
 FAX: (916) 774-7040

**NOMINATION FORM – Page 2  
FOR H.R. LABOUNTY SAFETY AWARD PROGRAM**

**Nominee:**

Describe the overall purpose of your idea and how it works.

To correct unsafe condition inside meter box  
(pinch point & hand injury) by bringing tools and hands out  
of the meter box

What is the major impact it has on savings and/or efficiency?

Eliminate smashing your hands, give more leverage opening  
and closing of blow-off valves.

Please attach any photos or documents that support your idea.
