

# H. R. LABOUNTY SAFETY AWARD PROGRAM NOMINATION FORM

OPS-CONST  
ERGO-FE  
ERGO-AP  
ERGO-LPP

Agency: El Dorado Irrigation District

Employee Nominated:

Name: Jayzack Leonard

Job Classification: Senior Construction Maintenance Worker

**Reason for Nomination:** Jayzack is responsible for cleaning lift station wet wells that range from 15-35 feet in depth using the hydroflushing/vacuum combination vehicle. Mr. Leonard recommended a design to install a permanently fixed 8" vacuum tube to the bottom of deep wet wells. The installation of such tubes will reduce the potential for back injury by eliminating the lifting of 75-100 lb. portable suction tubes from the wet well.

Nominated by: Ronald Kilburg, District Safety-Security Officer

Signature: 

Date: 3/4/2014

General Manager: Jim Abercrombie

Date: 3/4/2014

Hi Lee:

That is exactly it. Sorry I wasn't more clear.

Ron

Ron:

I am the gatekeeper for new submissions to the award program. I had some questions and John Haaf asked that I contact you directly.

We think we understand, but would appreciate a little more

detail. Prior to the new system, employees would have to lower pipe into the wet well to suction it out. With the new system, the pipe is permanently installed and all they have to do is connect their vactor to the pipe fitting outside the well. Is this correct? All of the manua handling of pipe into the well has been eliminated?

Thanks for your help.
