

VSP Retinal Screening Coverage Enhancement

Give your members a complete eye health experience with coverage for non-medically necessary retinal imaging. An enhancement to your VSP plan, retinal screening uses advanced imaging systems to take pictures of the inside of the eye, which helps increase disease detection.

Benefits through a VSP Network Provider

Specialty Eye Care Services

- Retinal screening coverage provides supplemental coverage for non-medically necessary retinal imaging, which takes digital pictures of the inside of the eye.
- While eye exams generally include a look at the front of the eye to evaluate health and prescription changes, a thorough screening of the retina is critical to verify the health of an eye.
- Screening helps detect early warning signs of common diseases, such as glaucoma, diabetes, macular degeneration, hypertension, and even tumors.
- If disease is detected, VSP providers also offer follow-up medical eye care, including any necessary referrals and consultations with the patient's primary care physician.

Retinal Images

- Create an opportunity for VSP providers to educate patients about their health and wellness by reviewing the various structures of the retina and explaining treatment options for any conditions revealed by the pictures.
- Provide a permanent and historical record of changes in the eye, enabling VSP providers to make important comparisons if potential problems show up at a future exam.

VSP Providers

- VSP providers are in retail, neighborhood, and professional settings, with 88% offering extended hours.
- Our providers average 21 years in practice, with 99% network retention, so our members benefit from long-term, consistent care.
- 100% of our providers are credentialed to NCQA standards.

Disclaimers

Retinal imaging is available at most VSP provider locations.

Promotions, like rebates, are continually evaluated and subject to change without notice.

Save up to \$2,500
