

ORDINANCE NO. 32-C

AN ORDINANCE OF THE CUCAMONGA COUNTY WATER DISTRICT OF SAN BERNARDINO COUNTY, CALIFORNIA, FIXING RATES, RULES AND REGULATIONS FOR SEWER SERVICES WITHIN THE CUCAMONGA COUNTY WATER DISTRICT AND REPEALING ORDINANCE NO. 32-B

The Board of Directors of the Cucamonga County Water District of San Bernardino County, California, DOES ORDAIN as follows:

SECTION I: DEFINITIONS

- 1.1 **"BOARD OF DIRECTORS"**: The Board of Directors of the Cucamonga County Water District.
- 1.2 **"CERRITO ROJO COMMUNITY SEWER SYSTEM" (CERRITO ROJO AREA)**: The community sewer system constructed by the District to provide sewer service to homes on the 21 lots in Tract #4855 (said homes and tract being the "Cerrito Rojo Area").
- 1.3 **"CHINO BASIN REGIONAL SEWAGE SERVICE CONTRACT"**: That certain agreement so entitled, executed by and between the District and the Chino Basin Municipal Water District on August 14, 1972, and subsequent revisions thereto.
- 1.4 **"COMMUNITY SEWER SYSTEM"**: Any sewer maintained by the District. The term used herein includes all physical facilities of the wastewater collection system, but does not include storm drains or channels for conveyance of natural surface waters.
- 1.5 **"DEVELOPER"**: Any person who desires sewer service which requires the installation of new sewer service facilities.
- 1.6 **"DISTRICT"**: The Cucamonga County Water District of San Bernardino County, California.
- 1.7 **"DOMESTIC WATER SERVICE"**: Collection of sewage for sanitary purposes.

- 1.8 **"GENERAL MANAGER"**: The person designated by the District to supervise the operation of the public sewer system and who is charged with certain duties and responsibilities by this article, or his duly authorized representative.
- 1.9 **"LATERAL SERVICE CONNECTION"**: A line extending from the community sewer system within a street to the property line of a residence, commercial development, or industrial development.
- 1.10 **"MASTER PLAN"**: A five-year sewer system master plan which is used as a guideline by the District to determine when and which new sewer service facilities are required.
- 1.11 **"NON-DOMESTIC WASTEWATER"**: The wastewater resulting from or associated with waste flows from commercial, governmental, institutional and industrial sources as defined in Section 35.905-19, page 22525 of the Federal Register dated August 21, 1973.
- 1.12 **"NON-DOMESTIC WASTEWATER PERMITS"**: As set forth in Ordinance No. 28-C.
- 1.13 **"NPDES PERMIT" (National Pollution Discharge Elimination System)**: A permit issued pursuant to Section 402 of the Act (33 U.S.C. 1342).
- 1.14 **"OFF-SITE SEWER FACILITIES"**: Sewer facilities necessary to transport sewage away from a parcel of land.
- 1.15 **"ON-SITE SEWER FACILITIES"**: Sewer facilities on or adjacent to a parcel of land, and necessary to collect the sewage from said parcel of land.
- 1.16 **"OTHER DEVELOPMENT"**: A parcel of land within the District which is developed for other than residential or commercial use.
- 1.17 **"PERSON"**: Any natural person, firm, or corporation.
- 1.18 **"POTW" (Public Owned Treatment Works)**: That portion of the community sewer system designed to provide treatment to wastewater.
- 1.19 **"SERVICE CHARGE" - "USER'S CHARGE"**: A recurring monetary charge of the District for sewage disposal discharge installations which contribute waste flows, either domestic or non-domestic, into the community sewer system. The charge shall be for the collection or the collection and treatment of wastewater, and for the provision of the facilities therefor. The charges for use shall be computed pursuant to Exhibit "A" of this Ordinance, and Exhibit "C" of Ordinance No. 28-C. The charges for use may be related to water consumption, size of the water meter or the connection, the wastewater flow, strength of

wastewater, number and type of plumbing fixtures, or the means of determination other than charges against property.

- 1.20 "SEWER EQUIVALENT DWELLING UNIT (SEDU)":** Measurement of sewer demand on the District sewer system defined as the average annual sewer usage per single family residential home (270 gallons per day per home).
- 1.21 "SEWER SYSTEM CAPACITY FEE":** A charge imposed when connecting to the District's physical facilities for the purpose of partially funding the necessary increased capacity needs of the system created by the new service connection Capital Improvement Program.
- 1.22 "SEWER CONNECTION FEE":** May include one or more of the following charges made for connecting to the District's physical facilities: Sewer System Capacity Fee, Cerrito Rojo Connection Fee; Capital Capacity Reimbursement Fee.
- 1.23 "CAPITAL CAPACITY REIMBURSEMENT FEE":** A fee charged by Inland Empire Utilities Agency under the Chino Basin Regional Sewage Service Contract and collected by each member agency including this District. The fee is used for construction of regional wastewater interceptor, treatment and disposal facilities. This fee is applicable to all development that will discharge sewage into the District's community sewer system except as provided in Subsection 2.2 hereof.
- 1.24 "SEWER TRIBUTARY SERVICE AREA":** The area served by a local sewer collection line (approximately 8 or 10 inches in diameter) as designed by the District.
- 1.25 "SEWER TRUNK LINE":** A main sewer trunk line as shown on the Sewer Master Plan, as revised.
- 1.26 "SEWERLINE REFUND AGREEMENT":** An agreement between the District and a Developer to refund the cost of construction of off-site sewer service facilities. The amount refunded will be based on the acreage of the tributary service area adjoining the off-site sewer service facilities, and the direct benefit of such facilities.
- 1.27 "SINGLE FAMILY RESIDENCE":** A parcel of land within the District which is improved with a single family residential dwelling.
- 1.28 "SOURCE":** The point of discharge for domestic and/or non-domestic wastewater into the community sewer system.

- 1.29 **"SUBDIVISION"**: A parcel of land within the District under one ownership which is subdivided into two or more parcels for residential, commercial, or industrial purposes.
- 1.30 **"SURCHARGE"**: A monetary charge that is added to the users charge for all installations which contribute wastewater flows into the community sewer system and which are not located within the legal boundaries of the District, and also as may be provided in Ordinance No. 28-C.
- 1.31 **"USER"**: Any person who contributes, causes, or permits the contribution of wastewater into the District's public sewer system.
- 1.32 **"WASTEWATER"**: Liquid or water carried wastes from residences, commercial, public, institutional, governmental, and industrial establishments, together with such groundwater, surface water, and stormwater as may be present, whether treated or untreated, which is discharged into, or permitted to enter, the community sewer system and POTW.
- 1.33 **"WATER SUPPLY"**: Generally, the supply serving water to the area tributary to the District's community sewer system.

SECTION 2: SEWER SERVICE APPLICATION

- 2.1 Any person desiring sewer service shall sign an application on a form provided by the District.
- 2.2 Upon receipt of the application, the General Manager shall determine the connection fees and the service charges which are applicable, based upon the location and the type of service.

The following types of connection fees with rates established in Exhibit "A", which is attached hereto and made a part hereof, will prevail:

- (a) **SEWER SYSTEM CAPACITY FEE**
- (b) **CAPITAL CAPACITY REMIBURSEMENT FEES**: All lands within Assessment District No. 1, 2, 3, 4, 6, 9 and 10, and all parcels contained in Assessment District No.7 that are located adjacent to an original assessment district main and had a lateral constructed to said parcel at the time of original construction, shall be exempt from the following fees:
- (1) **Residential Development**: Every person constructing a new residential structure or mobile home park within the boundaries of the District after July 1, 1979, that received sewer services, shall

pay to the District a capital capacity reimbursement fee as set forth in Exhibit "A".

- (2) Commercial and Industrial Development: Every person who, after the effective date of January 1, 1980, constructs a building within the District to be occupied by a commercial or industrial business which will receive sewer service, or who alters an existing commercial or industrial building within the District which received sewer service for occupancy by a business that will discharge substantially more wastewater than the preceding occupant, shall pay to the District, a capital capacity fee as set forth in Exhibit "A".

2.3 A person who applies for sewer service to a specified premise shall be responsible for all charges and fees which accrue with respect to sewer service to such premise prior to the date service is ordered to be discontinued.

2.4 Any person proposing to discharge non-domestic wastewater shall make application to the District. Said application shall be in accordance with the requirements of Ordinance No. 28-C and shall include the submittal of a wastewater permit for non-domestic discharge as contained in Exhibit "A" of Ordinance No. 28-C.

2.5 Upon receipt of the Non-domestic Discharge Permit application, the General Manager shall:

- (a) Have the proposed discharge investigated; and,
- (b) Define all requirements and list them in the Non-domestic Wastewater Discharge Permit Form set forth as Exhibit "A" of Ordinance No. 28-C, The applicant shall sign the acceptance provision in said Permit before any waste is discharged to the District's community sewer system, and the acceptance of the terms and conditions of said Permit shall be a binding contract on the applicant or successors in interest or assigns.

2.6 In addition to the fees provided for in Subsection 2.2 above, each applicant for sewer service from the Cerrito Rojo Community Sewer System shall pay a connection charge as set forth in Exhibit "A".

SECTION 3: NEW SERVICE LATERALS

- 3.1** All lateral construction shall be performed at the expense of the Developer by a licensed sewer contractor.
- 3.2** District will provide Developer, as nearly as practical, with the correct station and elevation information for the lateral installation; however, the District assumes no liability for the accuracy of such information.
- 3.3** Where a connection fee has been established pursuant to Subsection 2.2, such charge shall be paid in advance by the applicant before the connection is made.
- 3.4** By acceptance of sewer service, each customer accepts and consents to such conditions of grade, capacity, and quality regulations as may, from time to time, exist under the current operating practice of the District prevailing at the location of the lateral location, and waives any claim against the District for damages caused by, or arising out of, insufficient capacity, changes in quality standards, or interruption of service due to material causes or normal maintenance and cleaning practices of the District.
- 3.5** Each house or building under separate ownership must be provided with its own lateral connection, unless otherwise approved.
- 3.6** The District reserves the right to limit the number of houses, or buildings, or the area of land under one ownership to be supplied by one lateral connection.
- A lateral connection shall not be used to service adjoining property, or to service property of the same owner on opposite sides of the public street or alley.
- 3.7** When property provided with a lateral connection is subdivided, the lateral connection shall be considered as belonging to the lot or parcel of land, which it directly enters.
- 3.8** No lateral connection shall be used for both domestic sewer service and non-domestic sewer service unless the owner shall have separate collection facilities installed within the plant, and a sampling manhole accessible to the District where samples may be taken prior to convergence of both sources as defined in Ordinance No. 28-C.
- 3.9** The District reserves the right to determine the size and location of lateral connections. The customer's line should not be installed until the lateral connection has been installed to the property line. In the event the customer's line is installed prior to the lateral construction, or prior to uncovering the end of the lateral connection, the District will not be liable for any additional costs to make a proper connection.

- 3.10 The District shall not be responsible for stoppages which occur in the customer's lateral from the building to the customer's property line.
- 3.11 Every lateral connection shall be installed to the property line in accordance with the requirements and the specifications of the District. In addition, every lateral connection shall have a clean-out device at the property line and a backflow prevention device within private property, installed by the property owner, when connections are made. A waiver of the backflow prevention device requirement can be granted, provided that the elevation of the finished floor of the building connecting to the sewer is a minimum of 2' (two feet) higher than the highest manhole in the sewer trunk line to which the building is being connected, and the owner of the building signs a waiver acknowledging that the backflow prevention device has not been installed and holds the District harmless from any unforeseen acts that result from sewage backing up the sewer lateral and into the owner's building.

SECTION 4: SEWER SYSTEM CAPACITY FEE

- 4.1 Each developer making written application for sewer service from the District shall pay a "Sewer System Capacity Fee" in an amount determined and based on the size and number of meters installed for the Developer's development pursuant to Exhibit "A" of this Ordinance, or in the amount determined in a Refunding Agreement to be entered into between the Developer and the District pursuant to Section 5.5, whichever is greater.
- 4.2 The primary purpose of the Sewer System Capacity Fee is to repay the costs of construction of treatment and delivery facilities required to meet the sewer demand of the District. Such financing shall include the repayment of any debt incurred by the District to construct such facilities, except that which is repaid by ad valorem taxes or special assessments.

Revenues from the Sewer System Capacity Fee shall also fund master planning and studies related to sewer facilities, the capital facilities and equipment necessary to operate and maintain the sewer system, and an allocated share of costs related to general facilities and equipment required to administer the overall operations of the District.

- 4.3 The principal basis of the determination of the amount of the Sewer System Capacity Fee is the average investment in the sewer system by current customers. The Fee to users is designed to recognize the current value of providing the capacity necessary to serve additional users. The charge is computed by establishing fixed asset value under a reproduction cost basis and deducting relevant liabilities from this amount. The number of equivalent units of service is then divided into this difference to establish the Sewer System Capacity Fee.

The method for calculating the Sewer System Capacity Fee is based on the replacement cost less depreciation and the equation for determining the fee is as follows:

$$\frac{\text{Original Value of System, } \$\$ \times \text{ENR-CCI-LA} - \text{Depreciation}}{\text{Current Number of Equivalent Meters}}$$

- 4.4 The Sewer System Capacity Fee shall be reviewed annually. The review shall update the current value of the sewer system by including all facilities that were added to the system during the preceding year less depreciation of the existing facilities. The updated value will also include the additional equivalent units of service that were added during the preceding year. The Sewer System Capacity Fee will be adjusted according to the outcome of the annual review.

SECTION 5: NEW FACILITY INSTALLATIONS OTHER THAN LATERAL CONNECTIONS

- 5.1 Authority is hereby delegated to the General Manager to determine when new sewer facilities are needed as a condition of new sewer service. "Sewer Service Facilities" include sewer mains, manholes, laterals, and any other necessary appurtenances.
- 5.2 Every Developer shall file a written application for sewer service on a form furnished by the District.
- 5.3 The Developer shall be responsible for constructing, or having constructed, such on-site sewer service facilities as are required by the District. On-site sewer service facilities shall only be constructed following the District's approval of plans which are to be submitted by the Developer in a form as required by the General Manager. Under no circumstances will such construction take place unless streets are well defined, both in plan and elevation. If, after the sewer trunk lines, mains, lateral services, and manholes are constructed, they have to be moved or lowered because of incorrect information as to grade, property lines, etc., all expenses incurred by making the changes shall be borne by the Developer. If it is necessary to cut newly paved or surfaced streets, the resurfacing charges shall be paid by the Developer.

The Developer shall be required to pay fees based on either the "Sewer System Capacity Fee" as defined in Exhibit "A" or on a "Refunding Agreement", as defined in this Section, whichever fee is greater.

- 5.4 Whenever the General Manager determines that new off-site sewer service facilities must be installed in order to serve a parcel of land, the Developer shall

be responsible for constructing such off-site sewer service facilities as are required by the District. Off-site sewer service facilities shall only be constructed following the District's approval of the plans as submitted by the Developer in a form required by the General Manager.

- 5.5** The District will enter into a ten-year Sewerline Refund Agreement with the Developer whereby the District shall collect from other connections, and refund to the Developer, all the cost of the off-site sewer service facilities. Such refund agreements shall not include interest. The amounts eligible for refund will be established by the acreage of the property served by connecting to, and deriving benefit from, the off-site sewer service facilities, multiplied by the average cost per tributary service area acre served by the installation of said off-site sewer service facilities. Said sum will be payable on each annual anniversary of the agreement with respect to connections made to the off-site sewer service facilities in the preceding twelve months. The District may waive the above provisions and enter into different contractual arrangements with Developers only by action of the Board of Directors.
- 5.6** Refund agreements may be assigned or transferred, providing such assignments or transfers are accomplished in a manner approved by the District. Otherwise, refunds shall be made only to the original Developer, provided that if the Developer should die, his personal representative or distributees under his will may claim refunds within sixty (60) days after the same become due and payable under the agreement. If the original Developer is a partnership or corporation, the District shall pay any refunds to the successor in title to the assets of such partnership or corporation, provided due proof is made of the right to receive the same, and claim therefor is made within sixty (60) days after the same becomes due. If claims by successors in interest of a Developer are not made within the prescribed time, the right to refund shall terminate.
- 5.7** No sewer main shall be constructed in any street or other location not formally dedicated to public use, except by consent of the property owner and the District. Said consent shall be in the form of an easement deed to the District.
- 5.8** Title to all sewer service facilities, whether installed by the District or a Developer, shall be vested in the District.

SECTION 6: RATES AND BILLINGS

- 6.1** Every person whose property is in the District, and is served by a connection or connections with the District's community sewer system, whereby the domestic and/or non-domestic waste flows are disposed of by the District into the Regional Sewage System, or otherwise, shall pay a sewer user's charge and any surcharge as established by the District.
- 6.2** Rates for sewer service shall be fixed by Ordinance of the Board of Directors of the District, and attached hereto as Exhibit "A". The Board of Directors may, from time to time, in its discretion and by Ordinance, alter, change, amend, or revise the charges and rates for the services and facilities in connection with the community sewer system.
- 6.3** The rates for the several classes of sewer service shall be computed pursuant to Exhibit "A" of this Ordinance, and Exhibit "C" of Ordinance No. 28-C, and shall be billed at such intervals as are determined necessary by the Board of Directors.
- 6.4** The amount due for sewer service shall be set forth on the bills for water service, is due and payable upon presentation with the water bill, and shall become delinquent on the day indicated on the water billing statement. In the event any bill shall become delinquent, the sewer service may be discontinued without further notice. Service shall not be resumed until all delinquent charges, together with any charges necessitated by the resumption of such service, have been fully paid. Payment shall be made at the District Office in person or by mail, or at the District's option, to duly authorized Collectors of the District.
- 6.5** Whenever service is started during a month, the minimum charge shall be as indicated in Exhibit "A".
- 6.6** The Board of Directors may require any person liable to pay any community sewer user's charge to make a reasonable deposit with the General Manager to insure the collection of such charge.
- 6.7** Whenever the correctness of any bill for sewer service is questioned, the District will cause an investigation to be made. Bills reflecting clerical errors shall be adjusted, taking into consideration the historical volume of usage, seasonal demand, and any other factors that may assist in determining an equitable charge.

SECTION 7: QUALITY STANDARDS OF WASTEWATER

- 7.1 All wastewaters contributed into the District's community sewer system shall comply with the quality standards set forth in Ordinance No. 28-C, but in no instance shall said standards be less strict than all applicable State and Federal laws required by the Clean Water Act of 1977 and the General Pre-Treatment Regulations (40 CFR, Part 403).
- 7.2 In the event any user fails to comply with the effluent limitations, monitoring, or reporting requirements set forth in Ordinance No. 28-C, the District shall have, and may exercise, one or more of the remedies specified in Section 9 of this Ordinance. The listing of such remedies shall not be deemed exclusive, nor shall the District be prevented from exercising any other remedy provided by law or in equity.

SECTION 8: GENERAL MAINTENANCE AND INSPECTION

- 8.1 The District reserves the right at any and all times to discontinue sewer service for the repairing, extending, altering, or cleaning, etc. of sewer trunk line mains and the repairing and construction of manholes, and the repairing and renewing of sewer service connections.

When the service is to be discontinued for any of the above reasons, the District will make a reasonable effort to deliver a notice of the discontinuance to the customer or to some responsible interested person on the premises, but it does not assume any liability for the failure of the customer to receive or understand such notice.

- 8.2 The District assumes responsibility for the maintenance and operation of all District owned sewage collection facilities, which includes the lateral between the customer's property line and the sewage collection pipeline.
- 8.3 Authorized inspectors, agents and employees of the District shall have the right of entry and access at all reasonable times, into and upon, any and all, customer's buildings, grounds and premises, or any part or parts thereof (including any and all plumbing, water piping, fixtures, or connections located, used, maintained, or operated therein or thereon), for the purpose of:
- (a) Inspecting such buildings and premises to determine:
- (1) The manner and quantity of such use; or,

- (2) The existence of any condition causing, or likely to cause, affecting, or likely to affect, the collection of, or receipt of, sewer service.
- (b) Facilitating the enforcement, from time to time, by said District, of any and all of its applicable Rules and Regulations, each such inspector, agent and/or employee shall be furnished with, and upon request of the customer shall display, appropriate evidence of identification.

SECTION 9: ENFORCEMENT

9.1 HARMFUL CONTRIBUTIONS

The District may suspend the wastewater collection service and/or a Non-Domestic Discharge Permit when such suspension is necessary, in the opinion of the General Manager, in order to stop an actual or threatened discharge which presents, or may present, an imminent or substantial endangerment to the health or welfare of persons, or the environment, cause interference with the POTW, or cause the District to violate any condition of the NPDES Permit.

Any person notified of a suspension of the wastewater collection service or the non-domestic wastewater permit shall immediately stop or eliminate the harmful or dangerous discharges. In the event of a failure of such a person to comply voluntarily with the suspension order, the General Manager shall take such steps as are deemed necessary, including immediate severance of the sewer connection to prevent or minimize damage to the community sewer system or endangerment to any individuals. The District shall reinstate the non-domestic wastewater permit or the wastewater collection service upon proof of the elimination of the non-complying discharge. In the case of any such suspension, a detailed written statement describing the causes of the harmful discharge and the measures taken to prevent any future occurrence shall be submitted by the user to the District within 15 days of the date of occurrence.

9.2 REVOCATION OF PERMIT

Any user who violates the following conditions of this Ordinance, or applicable State and Federal regulations, is subject to having his permit revoked in accordance with the procedures of Section 8 of this Ordinance:

- (a) Failure of the user to factually report the wastewater constituents and characteristics of his discharge;
- (b) Failure of the user to report significant changes in operations, or wastewater constituents and characteristics;

- (c) Refusal of reasonable access to the user's premises for the purpose of inspection or monitoring; or,
- (d) Violation of conditions of permit.

9.3 NOTIFICATION OF VIOLATION

Whenever the District finds that any user has violated or is violating any prohibition, permit, or limitation of requirements contained in this Ordinance or in Ordinance No. 28-C, the District may serve upon such person a written notice stating the nature of the violation. Within 30 days of the date of the notice, a plan for the satisfactory correction thereof shall be submitted to the District by the user.

9.4 SHOW CAUSE HEARING

The General Manager may order any user who causes or allows an unauthorized discharge to enter the community sewer system to show cause before the District Board of Directors why the proposed enforcement action should not be taken. A notice shall be served on the user specifying the time and place of a hearing to be held by the Board of Directors regarding the violation, the reasons why the action is to be taken, the proposed enforcement action, and directing the user to show cause before the Board of Directors why the proposed enforcement action should not be taken. The notice of the hearing shall be served personally or by registered or certified mail (return receipt requested) at least ten (10) days before the hearing. Service may be made on any agent or officer of a corporation.

9.5 The Board of Directors may itself conduct the hearing and take the evidence, or may designate any of its members or any officer or employee of the District to:

- (a) Issue in the name of the Board of Directors, notices of witnesses and the production of evidence relevant to any matter involved in such hearings;
- (b) Take the evidence;
- (c) Transmit a report of the evidence and hearings, including transcripts and other evidence, together with recommendations to the Board of Directors for action thereon.

At any hearing held pursuant to this Ordinance, testimony taken must be under oath and recorded. The transcript, so recorded, will be made available to any member of the public or any party to the hearing upon payment of the usual charges thereof.

After the Board of Directors has reviewed the evidence, it may issue an order to the user responsible for the discharge directing that, following a specified time period, the discharge be discontinued unless adequate treatment facilities shall have been installed, or that specified devices or other related appurtenances shall have been installed on existing treatment facilities, or that existing treatment facilities, devices or other related appurtenances are properly operated. Further orders and directives as are necessary and appropriate may be issued.

9.5 LEGAL ACTION

If any person discharges sewage, industrial wastes or other wastes into the District's community sewer system contrary to the provisions of this Ordinance, Ordinance 40 & 28-C, Federal or State Pretreatment Requirements, or any order of the District, the District's Attorney may commence an action for appropriate legal and/or equitable relief in the Superior Court of the County of San Bernardino.

SECTION 10: PENALTY

10.1 CIVIL PENALTIES

The violation by any user of any provision of this Ordinance and/or Ordinance 28-C, may subject the discharger to the District's attorney seeking injunctive relief action, misdemeanor charges, or civil penalties of not less than 300 dollars per day per violation, 40 CFR 403.8 (f) (1) (vi). The EPA and State are authorized to seek civil penalties of up to \$25,000 for each day of violation.

SECTION 11: SEVERABILITY

11.1 If any provision, paragraph, word, section, or article of this Ordinance is invalidated by any court of competent jurisdiction, the remaining provisions, paragraphs, words, sections, and chapters shall not be affected and shall continue in full force and effect.

SECTION 12: CONFLICT

12.1 All other Ordinances and parts of other Ordinances inconsistent or conflicting with any part of this Ordinance are hereby repealed to the extent of such inconsistency or conflict.

SECTION 13: REPEAL OF PRIOR ORDINANCE

13.1 Ordinance No. 32-B is hereby repealed when this Ordinance becomes effective.

SECTION 14: ADOPTION

14.1 This Ordinance shall become effective sixty (60) days from its adoption.

ADOPTED this 11th day of January, 2000.

Jerome M. Wilson
President, Board of Directors
